ENTERPRISE SPIRIT

LEARNING

Choose the right direction, learning by watching, listening and asking to digest and absorb.

PERSEVERANCE

Choose the spirit, adjust yourself and hold out to the end.

HARMONY

Choose a good, make happy and progress by communication, praise and humility.

PROFESSION

Choose perseverance, specialize in one field and get the career achievement.

ABOUT US

TO GET YOUR SATISFACTION

NINGBO BAOSI ENERGY EQUIPMENT CO., LTD.

Ningbo Baosi Energy Equipment Co., Ltd. was founded in 2005, and in April 2015 the company began to issue stocks on the Shenzhen Stock Exchange (stock code: 300441). Headquartered in Chiang Kai-shek's hometown, holy land of Maitreya--- Fenghua.

The company bases on the compacted high-end precision parts manufacturing, extend to high-end alloy materials, equipment as well as integrated systems to achieve the development goal, to be a modern enterprise with high-end manufacturing core technology and harmonious development.

The company takes Learn, Harmony, Perseverance and Profession for enterprise culture, and advocates Maitreya culture, promote the spirit of Maitreya.

BAOSI VACUUM SEGMENT

In 2011, Baosi established vacuum business division, which specialized in design, manufacturing and sales of vacuum products. And in 2018, vacuum division developed into Vacuum Group.

Baosi Vacuum Group took the corporate culture as the core idea, aimed at providing one-stop vacuum solutions for customer, concentrating on making Baosi Vacuum be a world-class well-known vacuum brand.

INDUSTRY INVOLVED

People-oriented, common values, sincerely valued customers, comprehensive grasp of customer requirements, customers above all else, harmonious development, shared prosperity.

SINGLE STAGE ROTARY VANE VACUUM PUMP

SRV300B

SRV630[750]A/W

FEATURES

- The use of non-spring rotary vane to achieve low noise, low vibration and long service life.
- Built-in oil check valve is used to avoid the oil return phenomenon.
- Built-in forced fed oil pump is used to ensure the long-term continuous operation of the pump at atmospheric pressure.
- The use of air cooling, oil cooling, water cooling and other cooling methods to ensure the good cooling effect, and make the long-term stable running of the pump as well as the stable pumping performance.
- Reasonable structure has the advantages of easy assembly and disassembly, as well as the fast and easy maintenance.

PUMP RATE CURVE

SRV300B

Power supply: 380V-50HZ
 Vacuum gauge: Pirana vacuum gauge
 Vacuum pump oil: BS-100D for rotary pump

Weight	no oil/with oil	kg	201/210	217/236

- The value of 'ultimate pressure' in the sheet is measured by Pirani gauge when the Baosi special pump oil is used, and the value should be 5X10⁻², if the Mcleod gauge be used.
- Therefore, the Baosi special pump oil is recommended to guarantee the pump performance.

ROOTS VACUUM PUMP

BSJ100Z [70L 150L 300L]

BSJ600LC [1200LC]

FEATURES

- The use of oil-free intermediate seal, multiple sealed way to ensure the high clean vacuum environment in the rotor chamber.
- Advanced processing to ensure the good geometrical symmetry of the rotors, as well as low noise and long service life.
- Special shaft seal is used to achieve the long stable running without oil leakage.
- The BSJ-L series is made of all-aluminum alloy, heat sink, corrosion resistance, and efficient energy saving. The BSJ-LC series is made of cast iron. The unique liquid coupling method enables the pump to start directly under the atmosphere, which greatly reduces the time of pumping.
- Compact structure, light weight, and small volume.

- *1 The value changes depending on the performance of the fore pump. The above data is obtained when the pump is used in combination with a standard fore pump.
- *2 The value is measured by using a Pirani gauge. It is approx. one digit lower when a McLeod gauge is used.
- *3 Air cooling is available when the pressure is lower than 530Pa. Water cooling is required in continuous operation at a pressure higher than 530Pa.
- *4 The cooling water temperature of inlet port must be 5~30°C. When the temperature is too low, keep it in an environment that is not easy to condense.

SCREW DRY VACUUM PUMP

GSD Series

GSC Series

FEATURES

- Efficient rotor profile design with the high ultimate pressure.
- Oil-free, clean vacuum, combine with roots pump for system.
- Good geometrical symmetry, low noise, long working life.
- Remove condensable steam, dust, toxic and other gases, and will not be trapped in the pump chamber.
- Double-ended bearing support design for reliable rotor support, extremely low vibration and superior starting reliability, especially for special demanding process.
- Combined with lip-style seal and labyrinth oil-repellent structure to achieve strong sealing performance and long service life, with nitrogen purging to prevent gear box from the pollution of process medium to achieve oil-free vacuum environment.
- High-efficiency permanent magnet synchronous motor with frequency converter to maximize torque output for harsh processing demand water-cooled integral sealed motor design to eliminate oil leakage to improve operational reliability, extend service life and reduce maintenance costs.
- Intelligent control system design to realize the one-button start and stop by using intelligent program. The pump chamber can be automatically cleaned during shut down, and the remote control and monitoring functions can be realized through the external control I/O interface and RS485 interface (Modbus protocol).
- Compact-size, few parts, few spares, stable running, light weight, small size, easy installation.

APPLICATIONS

Metallurgy

Vacuum brazing, Electron beam welding, Nitro carburizing, Low pressure nitriding, Low pressure carburizing, Chemical vapor phase impregnation, Sintering, Metal injection molding, Precision investment casting, Electroslag remelting, Vacuum induction melting, Vacuum arc refining, Steel liquid degassing etc.

Coating

Roll-to-roll coating, Hard coating (CVD/DLC), Surface activation, Plasma spraying, Glass coating etc.

Drying

Freeze drying, Casing filling, Transformer drying, Pipeline drying, Capacitor drying, Lithium battery drying etc.

Plasma

Plasma welding, Ion nitriding, Plasma etching, Plasma cleaning etc.

Vacuum Chamber Exhausting

Space environment simulation, Gas recovery/ circulation, Vacuum chamber evacuation etc.

Photovoltaic

Single crystal silicon pulling, PV laminating, LED manufacturing etc.

Other

Laminator, Medical instrument etc.

APPLICATION SOLUTION

The various of vacuum pump we produce can provide you with the best performance solutions.
The following table are the typical application of dry screw vacuum pump. For other application, please contact us for advice.

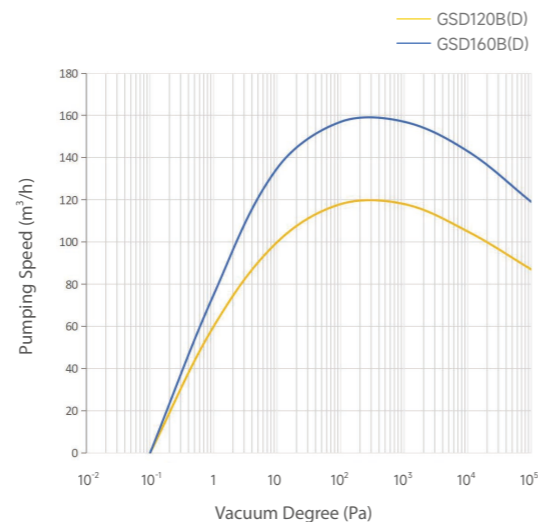

Application	Purging mode			Accessories	
	Low loading Sealed purging	Medium loading Sealed purging+ ilution purging+ inlet purging when starting and stopping	High loading Medium loading +High flow purging or flux rinse when stopping	Inlet filter Metal net	Silencer Washable

GSC INSTALLATION DIAGRAM

FLANGE SIZE

Single pump inlet flange is KF50 or KF40. Vacuum system inlet flange is VG80/ VG100 or VG200 as following size.

ACCESSORIES

The available with a wide range of accessories for a wide range of applications. The cost is saved on the premise of satisfying the user's requirements. All accessories can be fully integrated with the dry screw vacuum pump to create an efficient and safe system.

Inlet Adapter Flange

Due to the different connections of each device, we offer a range of inlet adapter flanges for vacuum pump. These flanges allow the installation of air intake filter and functional interface to ensure easy connection to the customer's equipment.

Intake Filter

Screw vacuum pump has excellent dust handling capacity in many applications. However, the screw vacuum pump cannot continuously extract solid matter, so in some applications, installing the air intake filter can greatly extend the maintenance interval of the vacuum pump.

Silencer

In order to reduce the noise of the exhausting, it's absolutely necessary to equip the silencer of the pump. We provide customers with standard silencer as well as a variety of silencer customization service according to the working conditions.

Check Valve

We choose the exhaust check valve according to the pressure of customer's working condition to minimize the noise of the vacuum pump.

SCROLL DRY VACUUM PUMP

IDSP6[10 16 36 45]

Scroll pump is a new kind of oil-free mechanical pump with features of simple construction, good sealing, high vacuum etc. As a high-technology product, it has highly technical requirement in design and manufacture. With benefits of low consumption, long working life, high reliability, and low noise, It has incomparable advantages in the application of clean process and has been popularly used in the market. IDSP series scroll dry pumps are scroll dry pumps with excellent performance and obvious price competitiveness, which are introduced by Baosi Vacuum for the characteristics of downstream applications at home and abroad.

APPLICATIONS

Clean vacuum, Backing turbomolecular pumps, Library, Analysis equipment, Leak detection, Beam line, Scientific researching, Medical equipment, Distillation/extraction/filtration, Laser, Semiconductor (LED/LCD), Photovoltaic, Coating (PVD/CVD), Battery, Glove box, Beam welding/laser welding, Space simulation.

PUMPING RATE CURVE

HI-VACUUM ANGLE VALVES

GD

GDQ

GDC

This valve is suitable for working medium with air and non-corrosive gas. It is used to cut or turn on the vacuum line and is one of the important components of the vacuum system. The hand wheel is turned by hand (manual) or compressed air (pneumatic) as the driving force and the mechanism is connected with valve plate to lift and lower, and the valve opening and closing action is completed.

GD SERIES/GDQ SERIES/GDC SERIES HV VALVE FEATURES

- Two position three-way, two position five-way solenoid valve components, quickly combine combinations through simple operations to meet the different needs of customers;
- Standardized, modular design, easy to replace and repair;
- Dust-proof design, suitable for the application of a small amount of dust;
- The dynamic seal is welded with AM350 material with a service life of 800,000 to 1,000,000 times ;
- The pneumatic valve opening/ closed position is a mechanical micro switch and magnetic switch:Micro switch, with sensitive response, reliable output, strong anti-interference.Magnetic switch, can be adjusted in a small range.
- Anodizing surface of the aluminum alloy valve
- Manual and pneumatic valve equipped with mechanical location instructions;
- Electromagnetic parts adopt energy-saving design.

APPLICATION

Widely applied in semiconductor, photovoltaic, new energy, pharmaceutical, scientific research, laboratory, chemical, light industry, metallurgy, petroleum, machinery, electronics and other industries, as well as electric vacuum device manufacturing, light bulbs, vacuum flask manufacturing, vacuum welding, vacuum casting, instrumentation, printing and packaging machinery, etc.

GCQ SERIES HV PNEUMATIC GATE VALVE FEATURES

- Separate valve body design for easy maintenance and cleaning;
- No roller design, small friction in the valve body, conducive to clean, and low noise and low impact when moving;
- Mechanically lock the closed state of the valve to ensure that the valve can still be sealed reliably when the gas or electricity is cut off;
- Aluminum alloy valve body with anodized surface;
- Magnetic switch, position adjustable within a small range;
- Fewer parts for cost control.
- Service life : > 10,000 times
